

# First Page:- Home Page

As we are not login yet so, in Dashboard showing first to login

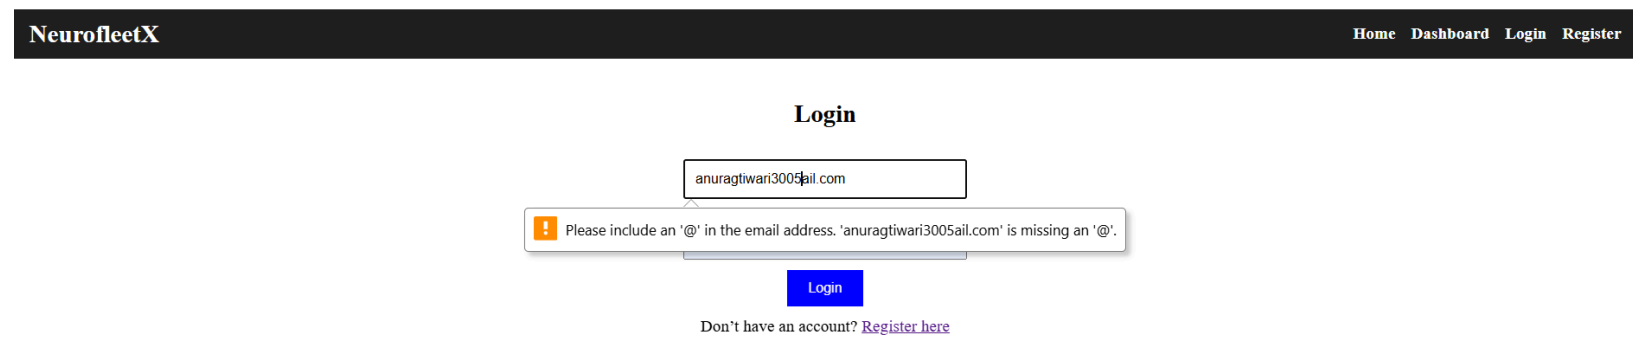

# Register Page

## Register

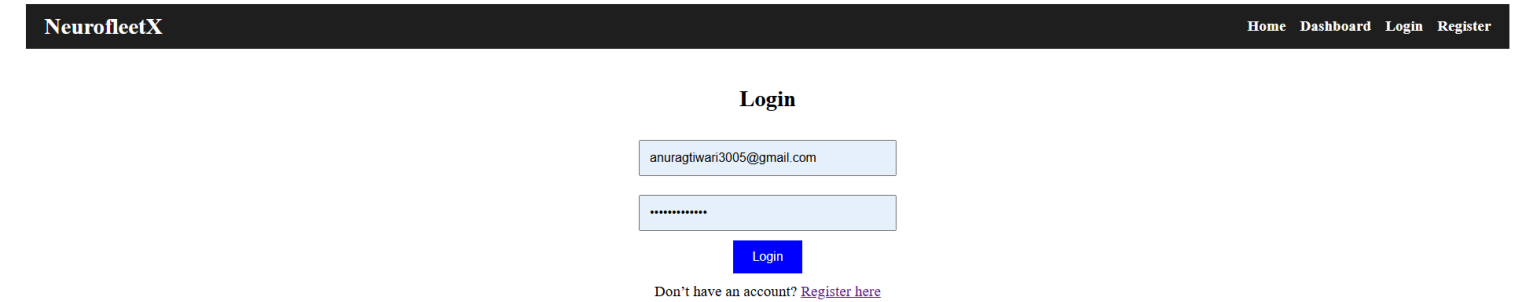

Already have an account? [Login here](#)

For login we have to register first without that we can't login

# For login page:- Test Cases

The screenshot shows a login page for 'NeurofleetX'. The header contains the logo and navigation links: Home, Dashboard, Login, Register. The login form has a title 'Login', an email input field containing 'anuragtiwari3005ail.com', and a password input field with masked characters. A red error message box is displayed below the email field, stating: 'Please include an '@' in the email address. 'anuragtiwari3005ail.com' is missing an '@'. Below the form is a blue 'Login' button and a link: 'Don't have an account? [Register here](#)'.

The screenshot shows a login page for 'NeurofleetX'. The header contains the logo and navigation links: Home, Dashboard, Login, Register. The login form has a title 'Login', an email input field containing 'anuragtiwari3005@gmail.com', and a password input field with masked characters. A blue 'Login' button is visible below the form. Below the button is a link: 'Don't have an account? [Register here](#)'.

When we include everything its  
successfully login.

Here its showing “@” is missing and it  
shows username is not valid.

**Next step :-we have to create auth to validate user.**
